CONNECTA-2 and Safe4RAIL-2 Final Conference

30th June 2021 - Online event

We are delighted to invite you to the **Final Conference of CONNECTA-2 and its complementary action Safe4RAIL-2**. The event offers a great opportunity to receive an insight into NG-TCMS solutions, establish a proactive and instructive dialogue with both projects partners and participate in the demonstrators.

This second edition of CONNECTA and Safe4RAIL initiatives continued the specification activities started in previous projects, covering the implementation of key technologies for NG-TCMS, such as Drive-by-Data, Functional Distribution Framework, and Wireless TCMS to achieve TRL-5. Technologies were also deployed in relevant urban and regional laboratory scenarios.

During the event project partners will present an overview on the Next-Generation TCMS (NG-TCMS) solutions developed by both projects and also demonstrators that will show key technologies test cases.

The Final Conference welcomes participants from railway undertakings, technology suppliers and manufacturers, safety experts, and authorities as well as academic participants in the domain of train control and communication systems.

Come and join us for this virtual event on Wednesday, 30th June held through a conference call platform. Don't miss out on this important event. The registration, agenda and practical information will be available in due time.

For any question about this event, please send an email to Igor Lopez at igor.lopez@caf or Aitor Arriola at AArriola@ikerlan.es.

Looking forward to meeting you soon!
